Applicant

SEMICONDUCTOR ENERGY LABORATORY CO., LTD.

- 1. This opinion contains indications relating to the following items:
  - V Box No. I

Basis of the opinion

- Box No. II Г
- Priority
- Box No. III
- Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- Box No. IV
- Lack of unity of invention
- V Box No. V
- Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability;
- citations and explanations supporting such statement
- Box No. VI
  - Certain documents cited
- Γ
- Box No. VII Certain defects in the international application
- Box No. VIII Certain observations on the international application

#### 2. FURTHER ACTION

If a demand for international preliminary examination is made, this opinion will be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA") except that this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of 3 months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

3. For further details, see notes to Form PCT/ISA/220.

# WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

Intermional application No.
PCT/JP2005/014462

Bo	ox No. I	Basis of the opinion
1.	With r	egard to the language, this opinion has been established on the basis of:
		the international application in the language in which it was filed
		a translation of the international application into , which is the language of a
	,	translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)).
2.		regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the ed invention, this opinion has been established on the basis of:
	a. type	of material
	<b></b>	a sequence listing
	_	table(s) related to the sequence listing
	b. form	nat of material
	Γ.	on paper
	Γ	in electronic form
	c. time	of filing/furnishing contained in the international application as filed
	1	filed together with the international application in electronic form
	Ė	furnished subsequently to this Authority for the purposes of search
	•	tainished subsequency to the purposes of scarcin
3.		In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.
Æ	Additi	onal comments:
4.	Audin	onal comments.

## WRITTON OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

Interpional application No.
PCT/JP2005/014462

į50i		Reasoned statement under Rule 43bis. I(a)(1) with regard to hovelry, inventive step or industrial applicability; citations and explanations supporting such statement			
1.	Statement				
	Novelty (N)	Claims	1-31	YES	
		Claims		NO	
	Inventive step (IS)	Claims	1-31	YES	
		Claims		NO	
	Industrial applicability (IA)	Claims	1-31	YES	
		Claims		NO	

#### 2. Citations and explanations:

None of the cited documents in the International Search Report does not discloses a light emitting device comprising, at least, a layer containing a hole-transporting material, wherein the layer is in contact with a cathode made from a reflective metal.

## WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

#### Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

With regard to claim 2 and 16

As described in the 17<sup>th</sup> paragraph of the specification, claimed inventions are characterized in that the electric erosion between a reflective metal (cathode) and a third layer including a transparent conductive film can be prevented by inserting a fourth layer between the third layer and the reflective metal cathode so that these two layers are not in direct contact.

However, claims 2 and 16 do not have a limitation on the material of the cathode. Therefore, both inventions are not substantially supported by the specification under the meaning of PCT Article 6.
